CUSTOM SOFTWARE · VALENCIA, SPAIN

Custom software in Valencia. We build the future.

—— Results, not promises.

— ABOUT US

Enterprise-grade software, cloud and cybersecurity — without the big-consultancy price tag.

10+

years building (since 2014)

80+

projects delivered

0

data lost in 10+ years

99%

uptime guaranteed by SLA

WHAT DRIVES US

We don't make software. We solve problems.

Enterprise technology shouldn't be a privilege of multinationals.
We put security, efficiency and scalability within reach of any
ambitious company.

01

Vision. A safer, more human digital ecosystem, within reach of any company.

02

Mission. Technology that solves business problems, with measurable return from month one.

03

Commitment. Your code from day one, fixed quotes and the same team start to finish.

— WHAT DEFINES US

Six principles in every project.

Security by design

Protection is designed from the first line, not bolted on at the end.

Technical excellence

Enterprise-grade code, maintainable and well documented.

Constant innovation

We adopt the latest — AI included — when it adds real value.

Full transparency

No fine print: fixed prices and visible progress.

Regulatory responsibility

GDPR, ISO 27001 and NIS2 as part of the design.

Results-driven

We measure in hours saved, risk reduced and sales won.

— WHAT WE DO

One home for your entire stack.

Custom software

Business platforms and apps built around your process.

Artificial Intelligence

Automation, assistants and prediction embedded in your workflows.

Enterprise Cloud

Robust, scalable, European infrastructure.

Cybersecurity

Pentesting, Zero Trust, 24/7 SOC and incident response.

NIS2 & GDPR

End-to-end regulatory compliance.

Cyber Training

Cyber Awareness programme to train your workforce.

CROSS-SECTOR EXPERIENCE

Sectors where we've already *proven results*.

- Aerospace & defence

- Agri-food

- Technology & IT

- eCommerce & retail

- Real estate

- Finance & fintech

- Telecommunications

- Communication & marketing

- Professional services

STRATEGIC ALLIANCES

Partners that back *our infrastructure.*

OVHcloud

European cloud infrastructure

Cloudflare

Network, security and performance

INCIBESpain's National Cybersecurity
Institute**Grupo Data**

Legal data compliance

STDD

Document digitisation

UnSistema

End-to-end IT maintenance

Apptimist

Mobile app development

CrowdStrike

Endpoint & threat intelligence

SECURITY BY DESIGN

Compliance isn't a formality: it's architecture.

We design every project on recognised standards. Your data stays in the EU, encrypted, and code ownership is yours from day one.

GDPR

Privacy and data protection by design.

ISO 27001

Information security management.

PCI-DSS

Security for payment processing.

EU-hosted data

Zero data losses in over 10 years.

FREQUENTLY ASKED

What clients ask *before we start.*

? Custom software or an off-the-shelf solution?

If off-the-shelf works, we'll say so. We build custom when the process is your competitive edge and no product fits.

? Do you handle maintenance and support?

Yes. We provide ongoing support, enhancements and monitoring, with service-level agreements (SLA) and 99% uptime.

? Do you run security testing (pentesting)?

Yes. We simulate real attacks on web, apps, cloud and internal network, with a report and prioritised remediation plan.

? Do you work with Artificial Intelligence?

We integrate AI where it returns value: automation, assistants on your data and prediction — always with human oversight.

? Are you GDPR and ISO 27001 compliant?

Compliance is part of the design. EU-hosted data, encryption and 100% code ownership for you.

w//b studio

Let's talk about your project.

30 minutes, no commitment, with a reply in
under 24h. We'll tell you how we'd approach
it — and what it would cost.

• GDPR

• ISO 27001

• PCI-DSS

• 100% your code
