CYBERSECURITY FOR BUSINESS · VALENCIA

Cybersecurity for companies that don't settle.

—— Results, not promises.

— WHY NOW

60% of SMEs that suffer a serious cyberattack close within 6 months.

Cybersecurity is no longer optional — and protecting your business starts with **a single conversation.**

⚠ WHAT DOES NOT ACTING COST?

⚠ Business downtime

🔒 Ransomware payout

↗ Lost clients and reputation

⚖ Fines of up to €20M

🛡 **60% of affected companies don't survive 6 months.**

— THE PROOF

**14+ years protecting
companies — and **zero**
breaches across active clients.**

60%

of attacked SMEs close within 6
months

0

breaches across active clients

+80

companies already protected

14+

years protecting companies

— SOUND FAMILIAR?

The phrases we hear *right before* a breach.

“ We’ve never been attacked.

→ Attacks are automated and don’t pick by size. **“Never” almost always means “not yet”** — or “we just don’t know it yet”.

“ IT already handles that.

→ IT keeps things running; security is a different craft. Without an external eye, the critical gaps go unnoticed **until the incident**.

“ We have a firewall and antivirus.

→ That was enough when everything lived in the office. Today attacks use **stolen passwords and legitimate access**: it takes a different strategy.

“ NIS2/GDPR doesn’t apply to us.

→ It applies with 50+ employees or €10M+ in revenue, across 18+ sectors — and **liability falls personally on management**.

01 / 06

We attack you before they do

PENTESTING · INTRUSION TESTING

We simulate a real attack, with permission, to find your weak points before the criminals do. **It's not a scanner: it's an expert genuinely trying to break in.**

We find the open door before the wrong people do.

WHAT'S INCLUDED

- ✓ Web/API pentesting per OWASP
- ✓ Cloud infrastructure audit (AWS/Azure/GCP/OVH)
- ✓ Red Team and adversary simulation
- ✓ Report with evidence and a prioritised remediation plan

02 / 06

No one gets in without verifying

ZERO TRUST · VERIFIED ACCESS

With cloud and remote work, the “perimeter” is gone. **We verify every access, every time**, inside and outside your organisation.

Zero trust by default: every access is earned, not assumed.

WHAT'S INCLUDED

- ✓ SSO + MFA + Conditional Access
- ✓ Network and application micro-segmentation
- ✓ BYOD policy and device posture
- ✓ Privileged Access Management (PAM)

03 / 06

Meet the law and avoid fines

NIS2 & GDPR · COMPLIANCE

Fines of up to €20M, personal liability for management and public disclosure of non-compliance. **We help you get compliant — before the inspection arrives.**

NIS2 · MANDATORY SINCE OCT. 2024

10M€

max fine, or 2% of global annual revenue

GDPR · ART. 32 · EU REGULATION

20M€

max fine, or 4% of global annual revenue

WHAT'S INCLUDED

- ✓ Gap analysis and compliance plan
- ✓ DPIA, records of processing and outsourced DPO
- ✓ Incident response plan (24h/72h notification)
- ✓ Support before the DPA and board-level training

04 / 06

Protect your AI

AI SECURITY · SECURING YOUR AI

If you use ChatGPT, copilots or assistants, you've opened a new door almost no one protects. **We close it.**

AI opened a new door. We close it before anyone walks through it.

WHAT'S INCLUDED

- ✓ Prompt injection and jailbreak prevention
- ✓ Output sanitisation and RAG hardening
- ✓ RBAC over prompts and vector stores
- ✓ Observability and logging of models in production

05 / 06

Someone watching 24/7

MANAGED SOC · DETECTION & RESPONSE

Continuous monitoring, day and night, without hiring a team of 4-6 analysts. **We detect and respond in under 1 hour.**

<1h

TO RESPOND

24/7 monitoring without building or paying for an in-house analyst team.

WHAT'S INCLUDED

- ✓ SIEM/SOAR on enterprise technology
- ✓ Threat intelligence applied to your sector
- ✓ Incident response with <1h SLA
- ✓ Monthly executive reporting

06 / 06

Your team, the first line of defence

TRAINING & AWARENESS

82% of breaches involve human error. **Corporate e-learning platform with CyberGlobal & Cyberguru** and real phishing simulations.

82%

FROM HUMAN ERROR

We turn the weakest link into your best alarm system.

WHAT'S INCLUDED

- ✓ Security awareness by role and risk level
- ✓ Realistic phishing simulations
- ✓ NIS2-aligned modules with certification
- ✓ Per-team progress reporting

— HOW WE WORK

Four steps, no surprises.

01

Assessment

We see where they could get in and the legal risk you carry. No commitment.

02

Plan & priorities

A roadmap by impact and cost; you decide what to tackle first. Fixed prices.

03

Implementation

In 2-week sprints, with your team or fully managed by us.

04

Continuous monitoring

24/7 monitoring and reports for management. Security is a programme, not a project.

— WHY US

The peace of mind of the big consultancies, *without being tied to any.*

+80

companies across Spain,
Italy and Europe

14+

years of experience

0

breaches across active
clients

**European coverage**

80+ companies protected across
Spain, Italy and the rest of
Europe.

**0 breaches across
active clients**

Our best argument is our track
record, not our pitch.

**14+ years of
experience**

Over a decade staying ahead of
real-world threats.

**No lock-in**

The same tools as the big
consultancies, without being tied
to any.

The software company that
builds **with you** — not for you.

w//b studio

Protect yourself before, not after.

Start with a free audit. We'll tell you where they could get in and what to do first — no jargon, no commitment.

- EU-hosted data

- GDPR

- NIS2

- Human oversight
